"In the arms of history"-Solo Exhibition-Majid Hojati

7th June-21st June 2021

History is a concept which encompasses the past days of the universe till today, history is a path, beginning with the first day of creation, and now we are only overcome by its effects. There is plenty of goodness and evil in history and from the vicissitudes it has gone through, it has many stories to tell. The sorrowful stories of nature, the creation of water and fire, the story of mankind, who first opened his mouth to speak, started writing, felt love, and finally fought everyone and everything to survive and live.

This story has been repeated at every moment till now, and reminded us that nothing is out of the realm of history.

History means seconds ago when I started writing this text and now those seconds have passed. The collection in front of you is nothing but bitter sweet moments which have happened sometime, somewhere and through the tokens they have left, are now crossing the peepholes of my mind, leaving marks on my photography canvas and recording a new concept as I desired. This is my historical account which embraces and recreates the past as I want.

And this story shall continue...

Majid Hojati

Artist
